

FORM R - TOXIC CHEMICAL RELEASE INVENTORY REPORT

WHAT IS FORM R?

Form R - Toxic Chemical Release Inventory (TRI Report)

A comprehensive annual report that documents the use, emissions and disposal of **toxic chemicals** that are commonly used in industry, including many metals, organics, and acids. This requirement is identified under Section 313 of the Federal Emergency Planning and Community Right-to-Know Act (EPCRA).

Every manufacturing company should assess if they are close to the reporting thresholds. If they exceed the threshold, a Form R, or in some cases a Form A, is required.

DEADLINE

July 1 is the deadline for submittal of the Form R.

ENFORCEMENT

Of all the annual EPA reports required of industry, the Form R reporting deadline is possibly the most aggressively enforced. The Chicago office of the U.S. EPA is involved in widespread enforcement of this regulation.

ADMIRAL CAN HELP

Our professional staff can help you comply with these rules.

We will run thorough an evaluation of your operations to identify toxic chemical usage, and determine if a TRI report is required. We can also complete the forms if necessary. At Admiral, we have 41 years of experience meeting the needs of industry.
