**SPECIAL NOTICE  
HAZARDOUS WASTE MANIFEST SUBMITTAL  
REMINDER FOR ANNUAL TRAINING**

The Illinois legislature has eliminated a hazardous waste requirement. **A copy of every hazardous waste manifest is no longer required to be submitted to the Illinois EPA, effective July 16, 2015.**

Previously, Illinois required that the generator send a copy of every hazardous waste manifest to the agency. This was not a federal requirement, and was often overlooked by companies.

The generator is still required to maintain a copy of each manifest at their place of business. Illinois EPA waste inspectors will ask to see those copies, along with other required records.

Manifests for nonhazardous waste were never required to be submitted to the state. So there is no change to their status.

**Admiral Environmental Services** can help you take the guess work out of your hazardous waste program. Call us for a review of your situation. Our experienced professionals will review your waste generation and management activities and let you know if there are any areas that need improvement.

Jill A. Meyer, P.E.  
Environmental Engineer

PS: We would like to remind you to perform **annual hazardous waste management training** and maintain complete records of the training. These requirements are for all Large Quantity Generators of hazardous waste. The U.S. EPA will issue a fine for failure to perform the required training. Admiral is available to perform this training at your facility.
